KOMPLEXE ANALYSIS 100

We invite you to attend an extended seminar on the occasion of a number of round birthdays in the complex analysis groups, to be held on

January 24, 2012
at the ESI in Vienna.

The tentative schedule is:

10:00: Coffee

10:45: Opening words by the Dean of the Faculty of Mathematics **Harald Rindler**

11:00: Bernard Helffer, Université Paris Sud, Orsay
Spectral asymptotics for a two- and three-dimensional Schrödinger operator with magnetic wells. (after Helffer-Kordyukov)

12:00: Lunch

14:30: Nordine Mir, Université de Rouen
Algebraic approximation in CR geometry

15:30: Coffee

16:00: Joaquim Ortega-Cerdà, Universitat de Barcelona
The multidimensional Nehari theorem

17:00: Martin Kolar, Masaryk University, Brno
The local equivalence problem in CR geometry

We invite you to join us for dinner (Stiegl Ambulanz im Alten AKH, 7 p.m.). If you want to come, send a short message to : friedrich.haslinger@univie.ac.at

F. Haslinger and B. Lamel
